

Director & Consulting Actuary

Job Description

About Mutual Capital Analytics

At Mutual Capital Analytics (MCA), our mission is to help all mutual insurance companies transform their businesses using data and analytics. We help our clients build, implement, and optimize analytics throughout their company to drive improvements and thrive in their markets.

Overview

As a member of the actuarial team at MCA, this role will be crucial to shaping the company's strategy as well as expanding our Actuarial practice. Reporting directly to MCA's Chief Actuary, you will be leading client engagements, getting involved in everything from data intake and manipulation to making actuarial selections and recommendations and presenting those to clients.

Responsibilities:

- Development and advancement of MCA's Reserving practice.
- In addition to reserve reviews, participate in a variety of other projects including pricing studies, trend analyses, and predictive modeling projects.
- Build out internal actuarial capabilities and perform ongoing reviews and analyses to assess our clients' product performance, extract new product insights, and recommend options based on projected benefits.
- Partner directly with all levels of our client companies to understand their business needs, influence their strategies, and collaborate on solutions.
- Present findings to client teams, focusing on ways to help them achieve their goals.
- Work across MCA's Actuarial and Product Management functions to create the best solutions for our clients.

Education and Qualifications:

- 7+ years of experience in actuarial or analytical P&C insurance roles.
- FCAS or ACAS required.

- In-depth knowledge of actuarial models and techniques, with a focus on reserving in personal and commercial lines markets.
- Highly analytical – excel at leveraging customer research and analytics to drive decisions.
- Strong technical background – familiarity working with tools such as SQL, R, Power BI, Tableau, or Python.
- Partnering and relationship-building skills, both internally and externally, across all levels of an organization.
- Strong communicator – able to explain technical concepts to non-technical audiences.
- Prior consulting experience is a plus.

Job Requirements and Work Environment:

- If local to CT office, ability to work effectively in a hybrid office environment, balancing in-office and remote workdays.
 - While based in CT, MCA welcomes applications for candidates seeking a fully remote working arrangement.
- Ability to travel when necessary (approximately 5-10%).
- For candidates who are pursuing their FCAS, MCA will provide exam support in the form of study time and fees for exams, materials, and seminars, as well as incentives for passing exams.
